No. D/2253 OF 1918.

OFFICE OF THE SURGEON-GENERAL WITH THE GOVERNMENT OF BOMBAY:
Poona, 26th September 1918.

From

THE HONOURABLE MAJOR-GENERAL
R. W. S. LYONS, M. D., K.H.P., I. M. S.,
Surgeon-General with the Government of Bombay;

To

THE SECRETARY TO GOVERNMENT,
General Department, Bombay.

Sir,

I have the honour to submit the report on the Civil Hospitals and Dispensaries of the Presidency for the year 1917. Before dealing with the Statistical Statements I would refer briefly to some matters in connection with the working of Hospitals and Dispensaries, Medical Schools, etc., which are worthy of notice.

2. Owing to financial stringency the only new buildings opened were the Out-Patient Department and Infectious Diseases ward at Ratnagiri Civil Hospital and the new Civil Hospital at Mahabaleshvar. Two new Dispensaries were opened. Through the generosity of the Western India Turf Club who gave a donation of Rs. 10,000 the X-ray room of the Sassoon Hospitals was remodelled, electric light provided in the David Sassoon Hospital and a Sister's Quarters, two new ward kitchens added to the David Sassoon Hospital and a band stand erected in the hospital grounds. It was not possible to provide out-patient departments or maternities at Civil Hospitals which at present have none or to open wards for advanced cases of Tuberculosis. These are three urgent needs. Until out-patient departments are provided at all hospitals, in which men and women can be seen separately, much time must be wasted in examining and treating patients particularly those suffering from genito-uriniary diseases and skin diseases which are of special importance from their relation to venereal disease. Of all forms of medical relief maternities are most needed and best appreciated. The mortality in child-birth is appalling, over 5 per 100 against 5 per 1,000 in England, and wherever maternities are opened the annual admission rate shows a rapid progressive increase. There should be a maternity at every Civil Hospital and at many of the dispensaries in large towns. The advantages to be derived from wards for advanced cases of tuberculosis, in which the sufferers are cared for and isolated, are self evident.

3. For some years past the status of the medical profession has been advancing every where. In India, however, the pay and position of the Provincial Civil Medical Services have not kept pace with what is going on elsewhere. The only advance made during the past four years has been in the case of those Civil Assistant Surgeons who are promoted to be Civil Surgeons whose pay has been raised from Rs. 350 rising to Rs. 500 to Rs. 400 rising to Rs. 600 and whose position has been improved so as to rank with Sardars of the first class. The pay and position of other Civil Assistant Surgeons and of Civil Sub-Assistant Surgeons are not what they should be. They require to be considerably improved in order to bring them into accord with present day progress.

4. Temporary women Sub-Assistant Surgeon have been posted to the Poona and Hyderabad Civil Hospitals. This is a first step toward supplying medical attendance by women and requires to be further developed by the appointment of women Assistant Surgeons on the hospital staffs of the large Civil Hospitals such as Ahmedabad, Karachi, Poona, Hyderabad and Belgaum and of women Sub-Assistant Surgeons at smaller Hospitals such as Surat, Godhra, Ahmednagar, Dhulia, Nasik, Rajkot, Sukkur, Bijapur and Dharwar. This would greatly extend the utility of these hospitals, as regards the treatment of women and children, and supply assistance by women doctors in the principal district towns.

5. All Civil Hospitals and the larger dispensaries should be provided with nurses (see the last Triennial Report). Facilities for training nurses are provided in the Civil Hospitals, Karachi, Poona and Ahmedabad, and at the Cama, St. George's and J. J. Hospital, Bombay, the King Edward VII Training Institution, Ahmedabad, and the Morarbhai Vrijbhukandas Dispensary, Surat. The nurses are required to pass the examinations of the Bombay Presidency Nursing Association and are registered by that body.

6. To meet the requirements of medical education there are at present in the Presidency only one College (the Grant Medical College) and the Medical Schools at Ahmedabad, Hyderabad and Poona. The Grant Medical College in which accommodation exists for only 600 students has now over 800 on its rolls and the three Medical Schools which provide for 350 students in all, have 548 on their rolls and are compelled to refuse many eligible applicants for admission owing to want of accommodation. The Medical Schools at Ahmedabad and Poona should be raised to the status of Colleges accommodating 500 to 600 students each and affiliated to the Bombay University. The accommodation of the Hyderabad School should be raised to 300 or 400 and a Medical

School established at Dharwar in connection with the Karnatic College. Increased hostel accommodation for students is required at all the four medical institutions. At Poona a suitable site exists, buildings only being required. At the Grant Medical College, Ahmedabad and Hyderabad sites are also required. Grounds are being acquired for this purpose at Bombay and Ahmedabad, but Hyderabad presents some difficulty owing to the limited area available for the Hospital and Medical School. A crying need at all these institutions is hostels for women students. The number of women students attending the Grant Medical College has risen in 10 years from 27 to 56 and in the Medical Schools from none to 16, even without any special encouragement. Now that Government is giving 4 scholarships for women students in the Grant Medical College and 26 in the Medical Schools their numbers may be expected to rise still further, and if hostels, under proper supervision are provided, a rapid rise may be anticipated, as parents will then have less hesitation in sending their daughters to study medicine than at present, when they are compelled to find lodgings in towns. The provision of these hostels which are so necessary opens a new field to public benefactors who are disposed to further medical education. It was hoped that the Bombay School of Research in Tropical Medicine and Hygiene would have been opened before now, but, although the necessary buildings and most of the equipment are ready, further progress has been delayed owing to the accommodation being utilized as a Convalescent Enteric Depôt for the detection of "carriers" among British soldiers. Even if it had not been required for this purpose it is doubtful whether the necessary teaching staff could have been obtained during the progress of the war. Another important medical requirement which has been postponed by the war is the provision of a building for the College of Physicians and Surgeons, Bombay. At present the College is indifferently housed in a hired flat, but when war is over suitable buildings should be provided including a convocation hall, library, museum, examination rooms, laboratories, etc., in a style and on a site worthy of the College and the City of Bombay.

7. The total number of institutions decreased from 774 in 1916 to 756 in 1917. The decrease was due to the closure of certain private non-aided institution. The number of State and State-aided institutions remains the same.

Statement A.

8. The total number of patients treated during the year was 2,712,612 as compared with 2,662,677 in 1916 an increase of 49,935 or 1·9 per cent. Of the total treated 65,250 were in-patients and 2,647,457 were out-patients as compared with 68,091 in-patients and 2,594,586 out-patients in 1916. The decrease in the number of in-patients is attributed to the changes in the hospital staffs which were rendered necessasry by the surrender of Medical Officers for military duty.

Statement B.

9. Of the in-door patients treated 45,146 were cured, 7,888 were relieved, 5,735 were discharged otherwise and 5,022 died. The ratio of deaths per cent. to the total treated was 7·7 against 8·4 in 1916.

10. The number of beds available was 6,671 against 6,686 and the daily average number of patients occupying them was 3,386·2 as compared with 3,542·8 in the previous year. The average daily attendance of out-door patients was 23,668·5 against 22,833·6 in 1916. The accommodation provided at the Gokuldas Tejpal and J. J. Hospitals (416 beds) is still the only provision for cases of serious illness and accidents occurring among Indians and in consequence cases of inhumanity continue to appear in the press because Medical Officers are compelled to refuse to admit accidents for want of beds or have to discharge convalescent patients to make room for others who are seriously ill. A general hospital of 200 beds is urgently required on a site which will serve the docks and railway sidings and a second general hospital of 400 beds at Parel.

11. The subjoined comparative table shows the principal diseases and mortality among the in-door patients in 1917 and the previous year:—

Statement C-I.

Disease.	1917.		1916.		Disease.	1917.		1916.	
	Total treated.	Deaths.	Total treated.	Deaths.		Total treated.	Deaths.	Total treated.	Deaths.
Cholera ...	146	68	202	82	Tubercle of the lung ...	1,158	407	1,119	310
Dysentery ...	1,469	194	1,482	140	Other tubercular diseases ...	970	132	1,104	125
Leprosy ...	1,525	179	1,546	190	Diarrhœa ...	1,148	250	1,202	277
Malaria ...	8,757	155	7,919	116	Injuries (general and local) ...	7,775	458	8,660	541
Plague ...	1,105	674	1,719	1,090	Labour cases, normal and abnormal ...	7,559	68	6,723	72
Small-pox ...	554	98	1,348	247					

12. The admissions for cholera, and diarrhœa call for no special remarks, but the admission rate for dysentry which is mainly due to contaminated water is much too high.

13. The admissions for malaria rose from 7,919 in 1916 to 8,757 in 1917. The increase occurred in Sind alone and was due to the heavy rainfall and the huge inunda-

tion of the Indus. Owing to the large number of Sub-Assistant Surgeons lent for military duty only 5 Sub-Assistant Surgeons could be deputed for anti-malarial duty in the most malarious parts in Sind. They treated 20,603 cases of malaria and 2,447 cases of other diseases. Quinine "treatments" worth Rs. 25,000 were sold, as usual, to the public in malaria striken areas, and in Sind the District Local Boards made arrangements for an additional special supply of quinine tablets.

14. The number of cases of tuberculosis was 2,128 against 2,223 in 1917. Although the admissions were less than in the previous year the death rate under this head shows an increase of 5·8 per cent. being 25·3 against 19·5 per cent. in 1916. It is hoped that effect will be given to the scheme for providing tubercular wards in Civil Hospitals and out-door dispensaries at any early date.

15. The admissions for labour cases continue to increase. The number rose from 6,723 in 1916 to 7,559 in 1917, an increase of 12·5 per cent. The increase since 1914 is 40·5 per cent. These figures indicate the constantly increasing popularity of maternities and the need for adding to their numbers until there is at least one in every town of any considerable size. It will be seen that the death rate has fallen to 8·9 from 10·7 per 1,000 in 1916. The fall in mortality is due to more *normal* cases having been admitted and to *abnormal* cases coming in earlier for treatment. It is hoped that as the proportion of normal to abnormal cases increases the mortality will continue to fall until it is reduced to under 1 per 1,000.

16. The total number of in-door and out-door cases of small-pox treated during the year 1917 was 789. Of these, 369 were unvaccinated, 380 vaccinated in infancy, 6 vaccinated in latter life and 1 re-vaccinated. The vaccinal condition was not known in 34 cases.

17. Amongst out-door patients the largest number of admissions were for *Malaria* 547,988; *Skin Diseases* 236,881 made up of secondary syphilis 22,895, ulcers 20,447 and all other skin diseases 193,539; *Dysentry and Diarrhœa* 89,600; *Genito-urinary Diseases* 54,608, composed of gonorrhoea 11,788, urinary diseases 11,324, diseases of the generative system 31,496 and *Tubercular Diseases* 8,410. It will be seen that *Malaria* is by far the greatest cause of sickness and ill health and that every possible effort for its abatement should be made by reducing the breeding grounds of mosquitoes in the vicinity of dwellings and by treating malarial patients to prevent their forming centres of infection. Next in importance come *Dysentry and Diarrhœa* caused by polluted drinking water. The very large number of cases of *Skin Diseases* including syphilis, and of *Genito-urinary Diseases* including gonorrhoea, points to the need for special arrangements in our out-patient departments for the diagnosis and treatment of these serious diseases. The comparatively large number of cases of *Tuberculosis* that apply for treatment shows the necessity for the provision of Tuberculosis Dispensaries, which will provide not only arrangements for their treatment but also for the "care and after-care" of the patients and their relatives.

Statement C-II.

18. The attendance at Police Canal, Forest and other State special institutions was 62,470 against 63,533 in 1916. At the Railway Hospitals the attendance rose from 231,360 in 1916 to 238,096 in 1917.

Statement D-I and D-II.

19. The total number of in-door and out-door patients treated at private non-aided institutions was 1,891,588 as compared with 1,957,385 treated in 1916.

Statement E.

20. Of the total patients treated, 17,869 were Europeans and Eurasians, 1,721,141 were Hindus, 816,579 were Musalmans and 157,023 belonged to other classes. There was a slight decrease of 6,514 in the attendance at female hospitals and dispensaries which treated 104,803 patients during the year as compared with 111,317 in 1916. The decrease was partly due to the closing of Mrs. Emanuel's Travelling Dispensary, Kolaba, which treated about 5,000 cases annually. The figures, however, speak favourably when compared with 85,898 in 1914 and 94,199 in 1915 and confirm the need for the provision of women doctors in hospitals and the establishment of special institutions for the treatment of women and children by women doctors.

Statement F.

21. 101,763 surgical operations were performed against 108,320 in 1916. The decrease is no doubt due to the same causes as led to the decrease in the total number of in-patients referred to above. They were performed on 100,730 persons with a mortality of 0·52 per cent. as compared with 0·57 per cent. in 1916.

Statement G.

22. The removal of tumours and cysts gave 1,611 operations with 15 deaths against 1,488 with 8 deaths in 1916, operations on bones 2,462 with 21 deaths against 2,514 with 35 deaths; amputations numbered 665 with 38 deaths against 687 with 43 deaths; catarct extractions 1,662 against 2,009; vesical calculi were removed by litholapaxy and lithority in 968 cases with 19 deaths against 942 with 13 deaths; lithotomy was resorted to in 231 cases with 23 deaths against 299 with 41 deaths.

23. Abdominal operations other than those for diseases peculiar to women numbered 1,879 with 155 deaths against 1,589 with 133 deaths while for diseases peculiar to women the numbers were 201 with 7 deaths against 266 with 8 deaths. The total number

of abdominal operations was 2,080 with 162 deaths against 1,855 with 141 deaths. These included 388 operations for the radical cure of hernia and 141 for abscess of liver.

24. Obstetric operations numbered 1,301 with 45 deaths against 1,244 with 54 deaths and operations for conditions peculiar to women other than obstetric and abdominal amounted to 1,119 with 14 deaths against 908 with 5 deaths.

25. Having regard to the numbers of the important operations performed during the year and the results obtained it will be seen that despite the reduction and changes of *personnel* necessitated by the war good surgical work has been done.

26. The total income, exclusive of the cash balance, amounted to Rs. 27,83,306 as compared with Rs. 26,12,472 in 1916. Local funds contributed Rs. 3,12,870 and municipal funds Rs. 5,23,298. The interest on invested capital yielded Rs. 54,568. Subscriptions from Europeans and Indians amounted to Rs. 1,09,475. Miscellaneous receipts amounted to Rs. 4,43,465 of which Rs. 1,77,255 were realized on account of hospital fees and Rs. 1,27,533 were contributed by the several Nursing Associations.

Statement H.

27. The total expenditure amounted to Rs. 27,76,397 as compared with Rs. 25,28,401 in 1916. Deducting from this Rs. 2,32,073 remitted into the Treasury on account of hospital fees, sale-proceeds of unservicable articles, etc., and Rs. 81,859 invested during the year, the net cost was Rs. 24,62,465. The average cost of each diet was Re. 0-3-11. The percentage of cost borne by Government was 54·4 against 54·8 in 1916.

28. On 1st January 1917 the invested capital stood at Rs. 9,67,965. During the year Rs. 81,859 were invested making a total of Rs. 10,49,224.

Statement J.

29. The practice of employing private medical practitioners on the teaching staffs of the Poona and Ahmedabad Medical Schools continues to work satisfactorily.

Honorary Staff.

30. Since the beginning of the war in 1914, forty-four Indian Medical Service Officers out of the sanctioned strength of 58 have been surrendered for Military duty. The appointments from which they were withdrawn were filled temporarily by appointing I.M.S. Officers to act in addition to their other duties, by re-employing 4 retired I.M.S. Officers, by employing 6 Civil Medical Practitioners (Missionaries and others) and by promoting 14 Civil Assistant Surgeons to act as Civil Surgeons. Twenty-three Military Assistant Surgeons out of a staff of 24 were surrendred. Their vacancies were filled by 2 retired Military Assistant Surgeons, 19 Civil Assistant Surgeons, and 2 Sub-Assistant Surgeons. Thirty-four Civil Assistant Surgeons and 3 Sub-Assistant Surgeons (M.C.P.S.), who volunteered for Military duty, were granted temporary Commissions in the Indian Medical Service. In addition to these 152 permanent Civil Sub-Assistant Surgeons, out of a strength of 525, and 11 temporary Sub-Assistant Surgeons were lent to the Military Department. Of these 125 are on Military duty in India and 38, have gone on active service out of India. The percentage (29·3) of Civil Sub-Assistant Surgeons lent was higher than that of any other province except the Punjab (38 per cent.) and was absolutely the highest in the case of those who volunteered for active service being 38 out of 165 or 23·3 per cent. while the Puujab which comes next gave 30 out of 195 or 15·3 per cent. Twenty-one Civil Sub-Assistant Surgeons were dismissed for refusing to go on military duty.

Medical Officers lent for Military duties.

31. Since war broke out the work of the Medical Department has been carried on under difficulties which increased year by year as further calls were made on it. It will be recognised that while, with a full staff and ample means, satisfactory progress in medical work can be made, it is a very different matter to carry this on in financial straits and with a depleted staff, many of whose members are entirely new to the work they are called upon to undertake. I would take this opportunity of thanking the entire Civil Medical Staff for the loyal manner in which they have carried out their duties under many difficulties. My special thanks are due to those Medical Officers, Civil Surgeons and others, who, in addition to their own duties, assisted the Military Department by undertaking the care of sick and wounded officers and men and also to the staffs of Grant Medical College and the three Medical Schools who efficiently carried on the work of these institutions, short-handed and with *personnel* subject to frequent changes.

32. The delay which has occurred in submitting this report is regretted. It was due to the pressure of work thrown on medical officers who furnish the necessary returns, my office and myself.

I have the honour to be,

Sir,

Your most obedient servant,

R. W. S. LYONS, Major-General, I.M.S.,

Surgeon-General with the Government of Bombay.

APPENDIX I.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT A.

Showing the number of Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1917.

[Total Population of the Province—27,084,317.]

Class of Civil Hospital and Dispensary.	Number open on 31st December 1916.	Number opened during the year 1917.	Number closed during the year 1917.	Number open on the last day of the year 1917.	Remarks.
1	2	3	4	5	6
I.—State—Public ...	51	1*	...	52	* Bechardas Dispensary transferred *from III Class* to I Class.
II.—State—Special—					
(i) Police ...	4	...	...	4	
(ii) Forests and Surveys ...	2	...	(*a*) 1	1	(*a*) Akola Dangs Travelling Dispensary.
(iii) Canals ...	5	...	...		
(iv) Others ...	15	...	...	15	
III.—Local and Municipal Funds ...	296	(*b*) 2	1*	297	(*b*) Badami in Bijápur District and Jalalpur in Surat District.
V.—Private—Aided ...	18	...	(*c*) 1	17	(*c*) Travelling Dispensary for women and children, Kolába.
'.—Private—Non-aided ...	333	(*d*) 7	(*e*) 26	314	(*d*) 1 in Surat 2 in Rewa Kantha and 4 in Káthiáwár Agencies. (*e*) 1 each in Bombay, Thána, Ratnágiri, Poona and Sátára Districts and Sholápur and Bijápur Agencies and Southern Marátha Country, 2 each in Ahmednagar, Sholápur and Ahmedabad Districts; 4 in Pálanpur and 8 in Mahi Kantha Agencies.
'I.—Railways ...	50	(*f*) 1	...	51	(*f*) Kankaria in Gujarát.
Total ...	774	10	28	756	

CLASSES I AND II.—These include all institutions maintained by provincial funds and under Government management. The fact that an institution ossesses endowments or receives contributions from local funds or private subscriptions has not been regarded as a reason for not classing it as 'State hen provincial and imperial funds are practically responsible for all the charges connected with it. Class I—'Public' are State Dispensaries which e open to the poorer classes of the public. Class II are State Dispensaries which serve only a special section of the public as indicated in the subassification attached.

CLASS III.—Local fund dispensaries include all institutions which are vested in local boards or municipalities or guaranteed or maintained by local or unicipal funds. The fact that such an institution is aided by private subscriptions, or receives assistance from Government in the shape of part of the lary of the medical officer, grants of medicine, or otherwise, has not been regarded as a reason for not classing it as a local fund dispensary, when s existence is practically dependent upon local funds.

CLASS IV.—Comprises institutions supported by private subscriptions or guarantee, but receiving aid from Government or local funds.

CLASS V.—Comprises institutions maintained entirely at the cost of private individuals or associations. The fact that Government supplies superior spection or registers has not been regarded as a reason for not treating it as a private non-aided dispensary.

CLASS VI.—Comprises all railway dispensaries, whether maintained by State railways or others.

STATEMENT

Showing the number of In-door and Out-door Patients treated in the State-Public, Municipal and Local
